

Federal Broadband Bureau

One of the most important infrastructure subjects of the last and future years is the broadband development in Germany. With the Federal Broadband Bureau atene KOM assumes an important task regarding the communication and information of this topic since December 2010.

The Federal Broadband Bureau has been originated as a centre of excellence of the Federal Ministry of Economics and Technology (BMWi) in order to support the broadband accessibility. The emphasis lies on consultation offers in technical and practical questions of the broadband development. The Federal Broadband Bureau is the contact point for all interested local authorities, for companies and residents. Here, information is collected, evaluated as well as passed on and strategies are developed.

Seminars

Sharing knowledge and building competences are among our main concerns, because only knowledge and competences make it possible to work self-dependent and successfully. We have elaborated a target-oriented set of seminars, designed to meet the individual needs of our customers. Seminars and workshops are available for

- Project management
- Project oriented financial management
- Development and implementation of European cooperation projects
- Project and location marketing

atene KOM – in short

The Agency for Communication and Public Management (atene KOM) offers European-wide consulting services for various subjects of defining regional competitive profiles and innovation development.

The work of atene KOM is supported by an intersectoral network of economics, scientists and engineers as well as decision makers from municipal and trans-regional public institutions all over Europe.

With excellent networking and wide-ranging creative input it is possible to always pick up new ideas, prepare and translate them into innovative projects. Our strength lies in intercultural cooperation and the moderation of joint work of economy, politics and science.

Business Segments and Competences

Shaping Competitive Profiles

We support regions and municipalities with the development of future-oriented and trend-setting profiles – no matter whether it involves infrastructure, renewable energies or education. For us a holistic approach is important which regards all facets of regional development.

Subsidies Consulting

Many ideas for the improvement of economical and life situations – especially in rural regions – imply financial support. We assist you to use all potentials and support lead partners and project partners with funds management.

Project Development

From an idea to the goal – the path always leads across a project. Our core competencies include the development of concrete projects and the arrangement of partner networks (national and international) with most different responsibilities.

Organisation Development

Working structures and the organisation of staff is an important requirement for successful acting in projects which are limited in time as well as for the accomplishment of day-to-day tasks. We support analysing organisational models as well as their procedures and help to optimise processes.

Project Management

A well organised implementation is vital for the success of a project. Financial management, progress reports, project meetings, content-related work, project evaluation – there's a lot to do! Optimised and well-proven process chains help us to cope with extensive assignments in a structured manner.

Ad hoc Management

Sometimes running projects need instant assistance. We are experienced in taking over project management and rearranging processes on short notice whether as an interim solution or on permanent base.

European Networks

The implementation of projects together with experts and partners from other European countries creates the best condition to benefit from other experiences and to find innovative solutions for individual questions. With our European-wide network we find the right partners for every subject from economy, administration, politics and science.
